ALUMNI TALK 1

The first online webinar under the Geotalks alumni talk series was conducted on 25th February 2021 at 7:00 pm via Google meet for the students of 1st semester B.Sc. Geology. The resource person of the webinar was Ms. Mariya James, an alumnus of 2015-18 batch with a record of 9th rank for Geology in both undergraduate and postgraduate level examination in MG University. The webinar was entitled as "Origin and types of mountain" which is a topic included in the syllabus of 1st semester B.Sc. Geology. The primary aim of the webinar was to make the children to think about a particular topic apart from the perspective of a single teacher. The poster regarding the webinar has been shared in the Whatsapp group 2 days prior to the webinar. The webinar started at sharp 7:00 pm via Google meet. Ms. Alana Benny (Assistant Professor, PG department of Geology) delivered the welcome speech. Then a brief introduction of the resource person was given which was followed by the main talk. A total of 24 students enthusiastically participated in the webinar. The talk covered every aspects related to the origin and types of mountains. The topic was explained by the aid of a power point preparation. The main session in which students were given a chance to clarify their doubts. Then the student coordinator Mr. Anas P.R. delivered the vote

(6) of Banks. The overall response of the students was so positive and they asked keenly for another talk from the same person as well.
