

AGRICULTURE SCOPE AND THREDS

Sustainability is the objective utilization of inputs without impairing the quality of environment with which it interacts. Therefore, it is clear that farming system is a process in which sustainability of production is the objective.

The over all objective is to evolve technically feasible and economically viable farming system models by integrating cropping with allied enterprises for irrigated, rained, hilly and coastal areas with a view to generate income and employment from the farm.

Webinar of MSC OFC was held on 15-june-2021 at 6 to 7 pm on Google Meet. MR .PHILIP CHACKO (young farmer) led the class for the members of OFC . during the webinar philip chacko presented his farming life experience in front of the students
